

Updating to Sovereign AI Brain 7.0.0-4

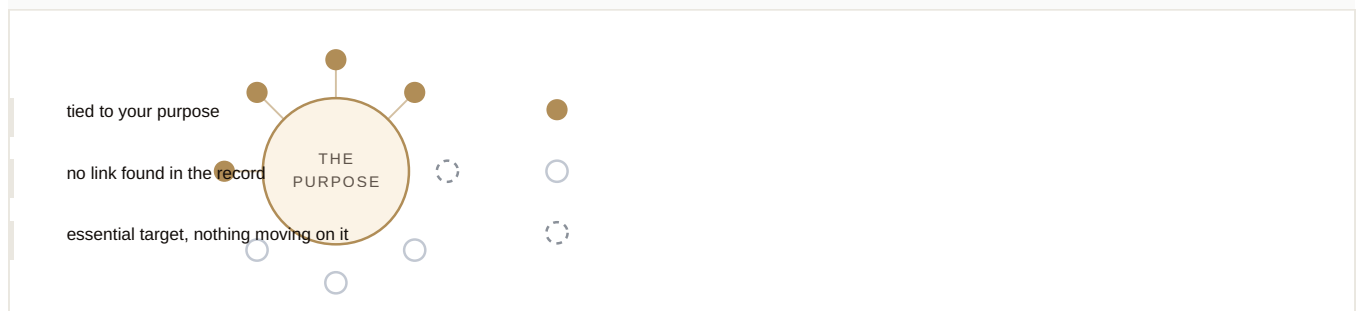

One download, one install. No terminal.

26 September 2026

What's new

A new reading: **ALIGNED**

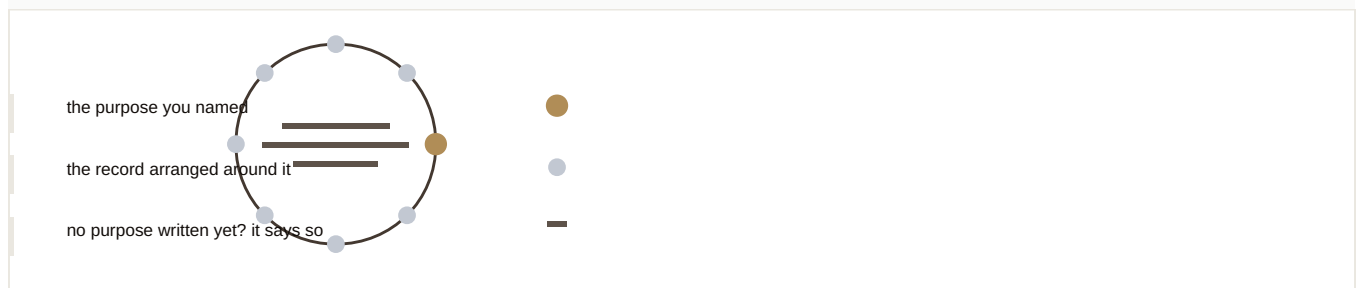

Stillpoint now counts the work your record can tie to your purpose, names the work carrying no link at all, and lists the essential targets nothing is moving on. It is the one reading that answers the question you actually have: is what I am doing the thing I said mattered?

Every bead of work is drawn against the centre. Bronze and joined means the record ties it to the purpose you stated; the faint ring is work carrying no link at all; the dashed one is an essential target that nothing is moving on.

Your purpose holds the centre

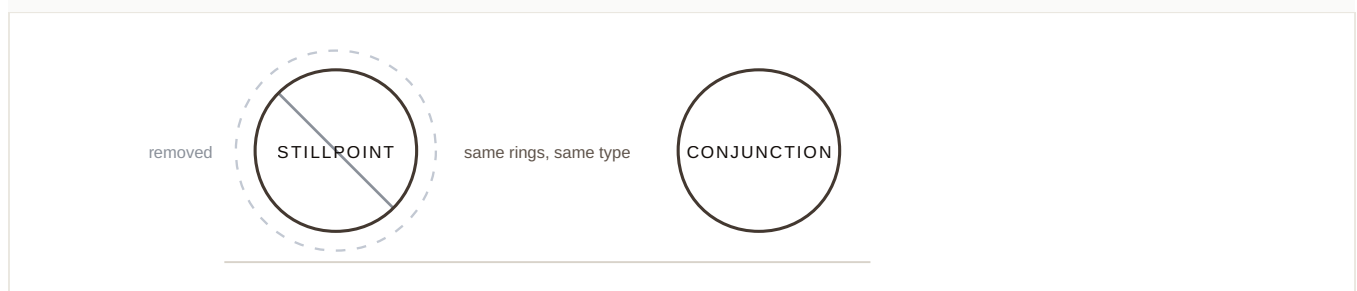

The middle of the instrument is no longer blank. It shows the purpose you stated, and when you have not written one yet it says so — rather than inferring a mission from whatever you happened to do last week.

The lines drawn at the centre are the purpose in your own words; the bronze bead marks the still centre itself, the one point the instrument is built around.

One instrument, less noise

Stillpoint now shares Conjunction's design and its type, so the two tabs read as one product rather than two. The peer ring and the pairing prompt are gone; that comparison belongs to Conjunction. This tab is now only about one Centurion and one life — yours.

The same ring, drawn to the same weight on both tabs. The dashed outer ring and the struck-through line are what was removed.

How to update

- 1

Sign in and open Account → Get Brain. Your download sits at the top of the page.
- 2

Double-click the downloaded file and choose Install. Fedora may ask for your password — that prompt is your computer, not us.
- 3

Reopen Sovereign AI Brain. The Focus tab loads Stillpoint.
- 4

Check the download first if you like: the sha256 below is the exact file we published.

Signed with Centurion’s release key. No reboot is needed — reopening the Brain is enough.

Before you install

A NOTE ON THE WARNING YOU MAY SEE

Fedora’s Software app labels anything it does not recognise as “Provided by a third party”. That is a statement about provenance, not about Centurion — every vendor package installed this way is labelled the same. Our builds are signed with Centurion’s release key, and the values below let you check that what arrived is what we published.

Release key fingerprint	25CB 4090 1F83 44D3 704F 9A4A C9E7 4757 8FA4 1F8F
sha256	62392bf4ba389804f887d1a17b3f346ee177a884d73a65fabfc8a28634649bf9
File size	98,174,248 bytes (93.6 MB). No reboot required.

Centurion AI Agent Limited · this sheet describes Sovereign AI Brain 7.0.0-4 as published for Fedora. The release key is also served at /centurion-release-pubkey.asc.
